

PRODUCT DATA SHEET

PROFESSIONAL ABSORBENT PADS L90908, L91908

Issue: Potential safety hazards are present around machines or in storage areas where leaks, drips, sprays or spills are most likely to occur.

Solution: A spill control plan should be developed with absorbent products readily available to control daily leaks and spills around your plant or to use in case of an emergency.

Description: OIL-DRI® Professional Absorbent Pads should be a part of every spill control plan. This material is made from chemically inert polypropylene and can absorb up to 15 times its weight in fluid. Use to safely absorb all fluid leaks and spills including most acids and bases. Strong bonded layers allow fluid to spread through the material quicker for the best absorption rate. Think of it as a paper towel on steroids. This handy 15" x 60" roll is perforated every 10" to easily convert from a 5 ft. roll to six 15"x10" pads. Store in tool cribs, garage, vehicles, or any place you may anticipate a need to quickly clean a mess. Universal absorbents can be used to absorb all fluids and general spills including oils, coolants, solvents, and water based fluids. Packaged six rolls per display box, or 14 rolls per case.

L90908 Display Case

What is cover stock?

Spunbond cover stock is an ultra-light weight polypropylene fabric that adds an additional layer of strength and durability to melt blown material.

ITEM#	DESCRIPTION	SIZE	PERF	QTY	PKG
